**Course title:**

**Corporate Social Responsibility and Sustainable Development**

**Credits:**

6 ECTS credits

**Teaching language:**

English

**Target students:**

Undergraduate students in Business, Economics, Finance, Social Science, Science, Engineering, Sustainability, and any student interested in Corporate Social Responsibility and Sustainable Development

**Teacher in charge of the course:**

Paul Devos, MSc (FGES / Faculty of Economics, Management, Sciences, and Accounting, *Université Catholique de Lille*)

Carl Pitchford, DBA, Dpai (FGES / Faculty of Business, Economy and Science, *Université Catholique de Lille*)

**COURSE PRESENTATION**

**Prerequisite:**

Students undertaking this course should normally have successfully completed at least one semester at university, or have equivalent experience. They must have some ability to work as a group and be able to communicate easily in English at a standard university level. In other respects, the course is intended to serve a mix of profiles and learning backgrounds for a more diverse international learning experience.

**Content:**

Evidence of current global threats such as climate change, resource scarcity, loss of biodiversity, social inequalities, and the impact of pollution on human health have forced governments, companies, and groups of citizens to reconsider our current paths to development. Linear industrial systems based on a take-make-dispose approach, the use of non-renewable energy sources, and the impact of urban sprawl over vast areas of fertile land, are examples of present-day phenomena that are currently being questioned across society.

Though alarming, these contemporary trends have resulted in the stimulation of human creativity. The promise of a better world presents not only the greatest challenge of our time, but also an enormous opportunity for those who want to reinvent the means by which we live as a society. Challenges include exploring new ways to produce the things necessary to satisfy our needs, how
we organize ourselves, and how we decide collectively. This is the promise of sustainable development.

This course will provide students with a concrete planning approach to move towards sustainable societies. Most sessions are based around specific business case studies, and are intended to be as practical and interactive as possible.

Course sessions will include:

**Part I: Corporate social responsibility: Background and core issues**

1) **Introduction and History of CSR**
   Defining CSR, understanding its relation to sustainability
   History and evolution of CSR

2) **Latest trends in CSR**
   The UN’s and the EU’s treatment of CSR
   Social responsibility in developing countries: the UN Global Compact

3) **Reporting standards**
   ISO 26000, Integrated Reporting, Global Reporting Initiative
   Case Study Examples of Sustainability Reporting
   Activity: 1 Group presentation and Report

4) **CSR and stakeholders**
   Stakeholder Mapping: relevant stakeholders and their expectations
   Shareholder capitalism vs. stakeholder capitalism, the triple bottom line
   Activity: 2 Group Presentations

**Part II: Ethics and economics of sustainability**

1) **Multinational corporations: main challenges**
   The purpose of a company, The polluter's dilemma
   Conceptual frameworks to enhance understanding about the impacts of policies
   Activity: Group report 2

2) **Sustainability: main concepts and issues**
   CSR and shared value creation, Greening the value chain, Greenwashing, Life cycle thinking
   Activity: Group report 3
Learning Outcomes:

By the end of the course, the students should be able to:

- Identify problems facing companies under the umbrella of social responsibility;
- Forecast the positive and negative impact of policies and actions in a manner that reduces corporate risk;
- Demonstrate the value of CSR in order to better inform decision-making.
- Understand the critical elements of a CSR initiative
- Audit an existing CSR initiative
- Describe and apply a four-step strategic planning process in various contexts (product/service development, business strategy, urban planning, etc.):
  - identify socio-ecological impacts,
  - create a list of potential measures (recommendations and strategic guidelines, good practices, eco-innovations, new business models, etc.),
  - set priorities, and
  - create an action plan
- Identify and understand specific European cases through case studies and site visits

WORKLOAD

*French contact hours = 60 minutes (in some countries/institutions, 1 contact hour = 45-50 minutes)*

<table>
