**COURSE PRESENTATION**

Prerequisite:

Students undertaking this course should normally have successfully completed at least one semester at university, or have equivalent experience. They must have some ability to work as a group and be able to communicate easily in English at a standard university level. In other respects, the course is intended to serve a mix of profiles and learning backgrounds for a more diverse international learning experience.

Content:

This course will provide students with an overview of the main issues of the European Union. It gives a broad overview of some current and classical themes of European integration. The objective of this course is to learn about the main European policies, how the Member States deal with them and how the EU interacts with the rest of the world. At the end of the course, the students should be capable of naming the various institutions and competences of the European Union as well as the current challenges faced by the E.U. both within its State members and in the world.

Through different topics, we reflect on how the European Union and the Member States interact and what part should play the EU in Europe and worldwide. Although since its creation the EU has undoubtedly achieved success and recognition, it faces current serious and complex challenges (stated in the Intended Learning Outcomes).
This course is then a unique opportunity for students to discuss about these successes and challenges.

Course sessions will include:

**EU: Historical, Cultural and Institutional overview**

- European History: Is Europe such a new idea? From the Greek Antiquity to the 21st century: a warlike History; the European Idea through centuries.
- The European Union: over 60 years of construction. From the European Coal and Steel Community (ECSC) to the Treaty of Lisbon
- EU Governance and the aftermath of the 2019 European elections
