

CLIMATE FRESK

3 hours to engage with climate change

Collective understanding & commitment

You don't have time to read the 2000 pages of the IPCC report? In 3 hours, the collaborative workshop "The Climate Fresk" allows you to understand the essential issues of climate change in order to take action.

Helping to push the world into transition

Only when everyone understands the current climate emergency will we be able to act at the scale necessary. For the last two years, the Climate Fresk has been creating an exponential wave of realizations and commitment.

The workshop

For an inexperienced or trained audience, based on IPCC reports, the Climate Fresk is the reference collaborative workshop to collectively understand the implications of climate change and trigger action.
